I recommend that Your Honorable Body accept a grant from the New York State Governor's Traffic Safety Committee in the amount of \$52,545 for the Comprehensive Toxicology Testing in Driving Under the Influence and Driving Under the Influence of Drugs Program for the period of October 1, 2020 through September 30, 2021.

The purpose of this grant is to improve highway safety by expanding the forensic toxicology services provided by the Office of the Medical Examiner's Forensic Toxicology Laboratory ("Tox Lab") in alcohol and drugged driving impairment cases. The Tox Lab provides alcohol and comprehensive drug testing as well as expert testimony in driving impairment cases. This grant will also allow the Tox Lab to perform the research, method development, and validation necessary to expand the scope of its drugged driving testing to include many of the new synthetic opioids and other novel compounds currently being widely abused and to analyze regional trends in drugged driving. In addition, the grant provides training funds to enhance the expertise of analysts when testifying regarding the effects of drugs on driving performance. This will be the ninth year the County has received this grant. This year's funding represents a decrease of \$7,125 from last year.

The specific legislative actions required are:

1. Honorable Legislators:

I recommend that Your Honorable Body accept a grant from the Regents of the University of New Mexico on behalf of the UNM Health Sciences Center, in connection with the UNM Health Science's Center participation in the federal Agency for Healthcare Research and Quality's Project Extension for Community Healthcare Outcomes ("ECHO") in a total amount not to exceed \$6,000 to advance improvements in COVID-19 preparedness, safety, and infection control at Monroe Community Hospital for the period of November 5, 2020 through February 18, 2021.

Project ECHO has established a community of over 250 training centers across the United States addressing a range of best practices and case-based group learning from multidisciplinary teams of quality improvement experts in a 16-week series. The weekly network sessions are designed to create a space to hear directly from nursing home staff about the COVID-19 challenges they are facing. The nursing homes that actively participate in the 16-week network training can receive compensation for participating.

The specific legislative actions required are:

1. Authorize the County Executive, or his designee, to accept a grant in a total amount not to exceed \$6,000 from, and to execute a contract and any amendments thereto with, the Regents of the University of New Mexico on behalf of the UNM Health Sciences Center in connection with the federal Agency for Healthcare Research and Quality Project Extension for Community Healthcare Outcomes to advance improvements in COVID-19 preparedness, safety, and infection control at Monroe Community Hospital for the period of November 5, 2020 through February 18, 2021.

Subject: Acceptance of a Grant from the CARES Act Provider Relief Fund – HHS Stimulus, COVID Infection/Mortality Rate Incentive Program Distribution, to Support Safeguarding Residents from the Perils of the Coronavirus Pandemic at Monroe Community Hospital

Honorable Legislators:

I recommend that Your Honorable Body accept a grant from the CARES Act Provider Relief Fund – HHS Stimulus, COVID Infection/Mortality Rate Incentive Program Distribution, in a total amount not to exceed \$45,805.10, to support safeguarding residents from the perils of the Coronavirus Pandemic at Monroe Community Hospital for the period of November 2, 2020 through December 31, 2020.

These funds are provided by the U.S. Department of Health and Human Services. The purpose of this incentive program is to reward nursing homes for keeping new COVID-19 infection and mortality rates among residents lower than the communities they serve, as analyzed against Centers for Disease Control data. This benchmark requirement for infection rate reflects the goal of the incentive program to recognize facilities that establish a safer environment than the community in which they are located. Facilities must also have a COVID death rate that falls below a nationally established performance threshold for mortality among nursing home residents infected with COVID.
