Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

After review that utilized the environmental assessment forms, County Environmental Records, the NYS Cultural Resources Information Survey, the NYS Spill Incidents Database Search, it has been determined that no significant adverse environmental impacts will occur because of this action.

The EAF Mapper indicated that a historical building was on or substantially contiguous to the property, however the closest eligible property is removed from the parcel by two properties. Additionally, no changes to the existing structure or property are anticipated and therefore will not impact the historical aspects of surrounding buildings or properties.

The EAF Mapper also indicated that a spill incident took place in 2004. This incident was documented and closed in 2008 which indicates that the necessary cleanup and removal actions have been completed and no further remedial activities are necessary at this time.

The action is for the transfer of a parcel of property that has existing facilities on site and no physical alteration nor disturbance of the property is planned as the facility is in use and will remain a part of the appurtenant facilities of the Galles-Chill-Ogden Sewer District ("GCOSD").

<input type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
<input checked="" type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
