Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term and cumulative impacts.

The action is for the sale of a parcel and does not include the physical alteration nor disturbance of the property. Part 1 of the EAF indicates the site contains or is near the following: archaeological resources, 100 Year Flood Plan and wellands.

Future use or development of the parcel may be subject to a wetland delineation and the New York State Freshwater Wellands Act

The sale of this property does not include physical disturbance or development of the parcel and will not result in any significant adverse environmental impacts.
