RESOLUTION NO. \_\_\_\_ OF 2021

**CLASSIFICATION OF ACTION AND DETERMINATION OF SIGNIFICANCE PURSUANT TO STATE ENVIRONMENTAL QUALITY REVIEW ACT FOR ACCEPTANCE OF TWO GRANTS FROM THE OSWEGO COUNTY SOIL AND WATER CONSERVATION DISTRICT FOR WATER QUALITY PROGRAM AND AUTHORIZING CONTRACT WITH MONROE COUNTY SOIL AND WATER CONSERVATION DISTRICT**

BE IT RESOLVED BY THE LEGISLATURE OF THE COUNTY OF MONROE, as follows:

Section 1. The Monroe County Legislature determines that the acceptance of two grants from the Oswego County Soil and Water Conservation District for the Water Quality Program and authorizing a contract with the Monroe County Soil and Water Conservation District is an Unlisted action.

Section 2. The Monroe County Legislature has reviewed and considered the Short Environmental Assessment Form dated February 2, 2021 and has considered the potential environmental impact of accepting the two grants from the Oswego County Soil and Water Conservation District for the Water Quality Program and authorizing a contract with the Monroe County Soil and Water Conservation District pursuant to the requirements of State Environmental Quality Review Act and has found that the proposed action will not result in any significant adverse environmental impacts. The Monroe County Legislature hereby issues and adopts the Negative Declaration attached hereto and made a part hereof and determines that an environmental impact statement is not required.

Section 3. The County Executive, or his designee, is hereby authorized to take such actions to comply with the requirements of the State Environmental Quality Review Act, including without limitation, the execution of documents and the filing, distribution and publication of the documents required under the State Environmental Quality Review Act, and any other actions to implement the intent of this resolution.

Section 4. This resolution shall take effect in accordance with Section C2-7 of the Monroe County Charter.

### Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The acceptance of a grant from the Oswego County Soil and Water Conservation District for Water Quality Improvement Project (WQIP) Program in Monroe County by the Monroe County Soil and Water Conservation District will have not have any significant adverse impacts to the environment for the following reasons:

The actions of Monroe County Soil and Water Conservation District are limited to Monroe County Streams that have or will have excessive streambank erosion that impacts water quality. These improvement projects are limited to areas of excessive erosion and are limited in size and scope. Total work conducted throughout Monroe County is expected to be below 2.5 acres, and is primarily performed along the side of streams with planting of vegetation, and with minor work conducted in-stream as necessary. When work is in stream or may impact streams the Monroe County Soil and Water Conservation District applies for a Protection of Waters Permit through the NYS DEC. As part of the application process for this permit, the applicant is required to conduct a project specific environmental review in accordance with the NYS State Environmental Quality Review Act.

Lastly, the work conducted under this program is an environmental benefit that improves the water quality of Monroe County Streams which flow into larger bodies of water such as rivers, streams, Irondequoit Bay, and Lake Ontario. Any negative impacts to water quality are temporary in-duration and ultimately result in a positive impact on water quality long-term. Accordingly, for the above reasons the acceptance of a grant from the Oswego County Soil and Water Conservation District for the Water Quality Improvement Project Program administered by Monroe County Soil and Water Conservation District will not result in significant adverse impacts to the environment.

- ☐ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
- ☒ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
