The purpose of these grants is to assist counties that are members of the Finger Lakes-Lake Ontario Watershed Protection Alliance ("FL-LOWPA"), in funding programs to improve water quality. In Monroe County, program components will include planning, education, and implementation of individual projects to improve water quality. The grants will be used to undertake water quality programs including the United States Geological Survey Cooperative Agreement for stream monitoring, public education of invasive species, and stream bank erosion repair projects. The County has received these program specific grants for nearly three decades.

The Monroe County Soil and Water Conservation District will provide stormwater management consulting and project management services to identify and implement water quality improvement projects such as stream bank erosion and shoreline stabilization in Monroe County and serve as the program manager for the New York State Watercraft Steward Program to control invasive species in Monroe County.
