**OUTCOME ASSESSMENT
METHODOLOGY:**

All program activities are designed to promote goal achievement and be quantified, measured and tracked. Routine (monthly, quarterly, annually) reviews of progress activities and outcomes allow modifications to be made as needed to support successful outcomes and goal achievement. Measurement tools are developed, and data is collected, reviewed and analyzed by program administrators and the agency Board of Directors, and is used to mark progress toward program goals and to make quality improvements. Measuring program performance is accomplished by querying the agency's Management Information System (which has been maintained for over 23 years) to generate utilization, outcome and impact reports no less than quarterly which is essential to planning, updating, revising and developing new procedures, protocols and services.

Reports compare actual outcomes to the projected outcomes and are used to inform service methodology or program objective modifications needed. These reports also identify emerging trends, changes in client demographics, geographic distribution and service utilization. Program goals are quantified so that data can be collected and progress evaluated. The efficacy of services/activities is reflected in the impact (i.e., knowledge gained, skills developed, and behavior change) on the participant and by their direct feedback as to its relevancy. Service methodology is modified as needed to improve efficacy. In this way, services remain client-centered and directed, current and meaningful and successful services/activities are noted and replicated.
