**Short Environmental Assessment Form
Part 3 Determination of Significance**

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The project consists of one site located at Webster Park, where a proposed dog park will be constructed. The project will see perimeter fencing established around the existing turf area, sidewalk and site patron improvements and a new .14 acre parking lot.

The parcel contains wetlands and those wetlands have been identified as federal wetlands. The proposed project is not located near any wetlands, thus there are no adverse impacts to wetlands anticipated.

The proposed project does occur within an archaeologically sensitive zone according to the New York State Historic Preservation Office. It is anticipated that there will not be a significant impact due to the limited disturbance required to construct the proposed parking area and other upgrades to accommodate the dog park.

The stormwater runoff from the new .14 acre parking lot will be directed to existing vegetated areas to allow that stormwater runoff to soak back into the ground. Disturbances of soil will be less than one acre in size and during construction, the use of soil erosion and sediment controls will be utilized during construction, therefore are no significant impacts anticipated.

Part 1 of the environmental assessment form (EAF) indicated that the parcel contains areas within the 100 year floodplain area. The proposed activities are not within the 100-year floodplain therefore, they will not be impacted.

There are no significant impacts from this project based on the information identified with in the EAF and supporting documentation provided by the Monroe County Department of Parks. Accordingly, Monroe County has determined that there will not be any significant adverse environmental impacts associated with the proposed action.

<input type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
<input checked="" type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
