RESOLUTION NO OF 2022
CLASSIFICATION OF ACTION AND DETERMINATION OF SIGNIFICANCE PURSUANT TO STATE ENVIRONMENTAL QUALITY REVIEW ACT FOR CONSTRUCTION OF PICKLEBALL COURTS AT BLACK CREEK PARK AND MENDON PONDS PARK
BE IT RESOLVED BY THE LEGISLATURE OF THE COUNTY OF MONROE, as follows:
Section 1. The Monroe County Legislature determines that the construction of pickleball courts at Black Creek Park and Mendon Ponds Park is an Unlisted action.
Section 2. The Monroe County Legislature has reviewed and considered the Short Environmental Assessment Form dated July 15, 2022 and has considered the potential environmental impacts of the construction of pickleball courts at Black Creek Park and Mendon Ponds Park pursuant to the requirements of State Environmental Quality Review Act and has found that the proposed action will not result in any significant adverse environmental impacts. The Monroe County Legislature hereby issues and adopts the Negative Declaration attached hereto and made a part hereof and determines that an environmental impact statement is not required.
Section 3. The County Executive, or his designee, is hereby authorized to take such actions to comply with the requirements of the State Environmental Quality Review Act, including without limitation, the execution of documents and the filing, distribution, and publication of the documents required under the State Environmental Quality Review Act, and any other actions to implement the intent of this resolution.
Section 4. This resolution shall take effect in accordance with Section C2-7 of the Monroe County Charter.
Environment and Public Works Committee; August 22, 2022 - CV: 7-0 File No. 22-0274

#### Short Environmental Assessment Form Part 1 - Project Information

#### Instructions for Completing

Part 1 - Project Information. The applicant or project sponsor is responsible for the completion of Part 1. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification. Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information.

Complete all items in Part 1. You may also provide any additional information which you believe will be needed by ar useful to the lead agency; attach additional pages as necessary to supplement any item.

Part I - Project and Sponsor Information  Manzoe County-Installation of Pickleball Courts			
Name of Action or Project:			
Installation of new Pickleba3 Courts at Black Creek and Mandon Ponds Par			
Project Location (describe, and attach a location map):	k		
The Project is located at two locations, Black Creek and Mendon Ponds Par			
Brief Description of Proposed Action:	X		
The County speks to install new pickleball courts at Black Creek Park and N			
At Black Creek Park, the new picideball courts would be constructed along it altrached. A minor expansion to the parking tot would occur to ansure that pa prayel parking lot located east of Hundred Acre Pond would be payed, thus of	tet moeth elde et ee	int to an existing parking lot. #### Short Environmental Assessment Form Part 2 - Impact Assessment

Part 2 is to be completed by the Lead Agency.

Answer all of the following questions in Part 2 using the information contained in Part 1 and other materials submitted by the project sponsor or otherwise available to the reviewer. When answering the questions the reviewer should be guided by the concept "Have my responses been reasonable considering the scale and context of the proposed action?"

	Will the proposed action crease a material conflict with an adopted fand use plan or zoning regulations?	No, or small impact may occur	Moderate to large impact may occur
2.			
3.	Will the proposed action impair the character or quality of the existing community?	V	
4.	Will the proposed serios have a st	V	
5.	Will the groupsed action could be	1	
6.	Will the proposed action result in an adverse change in the existing level of traffic or affect existing infrastructure for mass transit, biking or walkway?		
	Will the proposed action cause an increase in the use of energy and it fails to incorporate reasonably available energy conservation or renawable energy opportunities?		
7.	Will the proposed action impact existing:  a. public / private water supplies?		
	b. public / private wastewater treatment utilities?		
8.	Will the proposed action impair the character or quality of important historic, archaeological, architectural or aesthetic resources?		
1	Will the amposed action and to	V	
		V	
11.	Will the proposed action result in an increase in the potential for erosion, fleoding or drainage	7	
	Will the proposed action create a hazard to environmental resources or human health?	1

#### Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-

Black Creek Park. The new pickleball courts would be constructed along the north side of an existing parking lot. Mapping attached. Black Creek Park at this location is a moderately graded, grassed area, utilized for passive recreation. Enhanced use of this area for increased recreational purposes would occur on OdA hydic soils. Earthen disturbances during construction would be less than 0.95 acres and erosion and sediment controls would be utilized land anticipated.

Stormwater runoff from the project will be directed into existing vegetated swales, thus allowing stormwater runoff to infiltrate into the soil media on site. Runoff will be directed south away from Black Creek, ensuring that additional stormwater runoff is not directed to Black Creek. Stormwater runoff will not be conveyed via a stormwater sewer system. As a result of the aforementioned, no significant impacts to waterbodies are anticipated.

The NYS-DEC Environmental Resource Mapper was reviewed and rare freshwater mussels were identified. These mussels are not listed in NYS and as the project will not impact the stream in anyway, no significant impacts to flora and fauna are anticipated.

Mendon Ponds Park. The pickleball courts would be constructed in an existing gravel parking lot located on the east side of hundred acre pond. Mapping attached. Enhanced use of this area for increased recreational purposes would occur on the gravel lot, with PaC and OpC soils under the existing condition. There will be negligible, if any, earther disturbances as a result of this project as the current conditions are a gravel parking lot. Therefore, there are no

The asphalt paving of the existing stone parking lot will not significantly increase slormwater runoff, however the County does intend to establish two grassed swates adjacent to the pickleball courts. Runoff will not be convayed as stormwater sewer system. As a result of the aforementioned, there are no significant impacts to waterbodies are anticipated.

The NYS-DEC Environmental Resource Mapper was reviewed and while non listed species were identified and wallands are in the vicinity of the project area, the project will not significantly change the existing conditions on site. Therefore, no significant impacts to flora and fauna are anticloated.

This location is in the vicinity of Rare Freshwater Mussels - Not Listed by NYS

If your project or action is within or near an area with a rare animal, a permit may be required if the species is listed as endangered or threatened and the department determines the action may be harmful to the species or its habitat.

If your project or action is within or near an area with rare plants and/or significant natural communities, the

The presence of a unique geological feature or landform near a project, unto itself, does not trigger a requirement for a NYS DEC permit. Readers are advised, however, that there is the chance that a unique feature may also show in another data layer (le. a wetland) and thus be subject to permit jurisdiction.

Please refer to the "Need a Permit?" tab for permit information or other authorizations regarding these natural resources.

#### Office of the County Executive

Monroe County, New York

Adam J. Bello
County Executive

August 5, 2022

OFFICIAL FILE COPY

No. 220274

Not to be removed from the Office of the Legislature Of Monroe County

Committee Assignment

ENV. & PUB. WORKS-L

To The Honorable Monroe County Legislature 407 County Office Building Rochester, New York 14614

Subject: Classification of Action and Determination of Significance Pursuant to the State Environmental Quality Review Act for the Construction of Pickleball Courts at Black Creek Park and Mendon Ponds Park

#### Honorable Legislators:

I recommend that Your Honorable Body determine whether the construction of pickleball courts at Black Creek Park and Mendon Ponds Park may have a significant adverse impact on the environment pursuant to the State Environmental Quality Review Act ("SEQRA").

This project, a component of the proposed \$9.4 million in Phase II Monroe County Parks system-wide improvements, would bring additional pickleball courts into the county park system, located at parks that do not currently offer this amenity. The new courts would supplement our existing courts, which are very heavily used and were resurfaced in the first phase of parks improvements projects.

The construction of these pickleball courts has been preliminarily classified as an Unlisted Action. The SEQRA regulations found at 6 NYCRR Part 617 require that no agency shall carry out or approve an Action until it has complied with the requirements of SEQRA.

#### The specific legislative actions required are:

- 1, Determine that the construction of these pickleball courts is an Unlisted action.
- 2. Make a determination of significance regarding construction of these pickleball courts pursuant to 6 NYCRR 617.7.

3. Authorize the County Executive, or his designee, to take such actions to comply with the requirements of the State Environmental Quality Review Act, including without limitation, the execution of documents and the filing, distribution and publication of the documents required under the State Environmental Quality Review Act, and any other actions to implement the intent of this resolution.

This designation will have no impact on the revenues or expenditures of the current Monroe County budget.

I recommend that this matter be referred to the appropriate committee(s) for favorable action by Your Honorable Body.

Adam J. Bello

Sincerely

Monroe County Executive

#### Short Environmental Assessment Form Part 1 - Project Information

#### Instructions for Completing

Part 1 - Project Information. The applicant or project sponsor is responsible for the completion of Part 1. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification. Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information.

Complete all items in Part 1. You may also provide any additional information which you believe will be needed by or useful to the lead agency; attach additional pages as necessary to supplement any item.

#### Short Environmental Assessment Form Part 2 - Impact Assessment

Part 2 is to be completed by the Lead Agency.

Answer all of the following questions in Part 2 using the information contained in Part 1 and other materials submitted by the project sponsor or otherwise available to the reviewer. When answering the questions the reviewer should be guided by the concept "Have my responses been reasonable considering the scale and context of the proposed action?"

1.	Will the proposed action create a material conflict with an adopted land use plan or zoning regulations?	No, or small impact may occur	to large
2.	Will the proposed action result in a change in the use or intensity of use of land?	V	
3.	Will the proposed action impair the character or quality of the existing community?	V	
4.	Will the proposed action have as in-	V	
	Will the proposed action escult in and		
6.	Will the proposed action environ.		
7.	Will the proposed action impact assisting	V	
	n. public / private water supplies?  b. public / private wastewater treatment utilities?	<b>V</b>	
8.	Will the proposed action impair the character or quality of important historic, archaeological, urchitectural or aesthetic resources?	V	
9. 1	Vill the proposed action to:	V	
		V	
r U	Will the proposed action result in an increase in the potential for erosion, fleoding or drainage	<b>V</b>	
4 6 10 1	Vill the proposed action create a hazard to environmental resources or human health?

#### Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-

Black Creek Park. The new pickleball courts would be constructed along the north side of an existing parking lot. Mapping attached. Black Creek Park at this location is a moderately graded, grassed area, utilized for passive recreation. Enhanced use of this area for increased recreational purposes would occur on OdA hydic soils. Earthen disturbances during construction would be less than 0.95 acres and erosion and sediment controls would be utilized land anticipated.

Stormwater runoff from the project will be directed into existing vegetated swales, thus allowing stormwater runoff to infiltrate into the soll media on site. Runoff will be directed south away from Black Creek, ensuring that additional stormwater runoff is not directed to Black Creek. Stormwater runoff will not be conveyed via a stormwater sewer system. As a result of the aforementioned, no significant impacts to waterbodies are anticipated.

The NYS-DEC Environmental Resource Mapper was reviewed and rare freshwater mussels were identified. These mussels are not listed in NYS and as the project will not impact the stream in anyway, no significant impacts to flora and fauna are anticipated.

Mendon Ponds Park. The pickleball courts would be constructed in an existing gravel parking lot located on the east side of hundred acre pond. Mapping attached. Enhanced use of this area for increased recreational purposes would occur on the gravel lot, with PaC and OpC soils under the existing condition. There will be negligible, if any, earthen disturbances as a result of this project as the current conditions are a gravel parking lot. Therefore, there are no

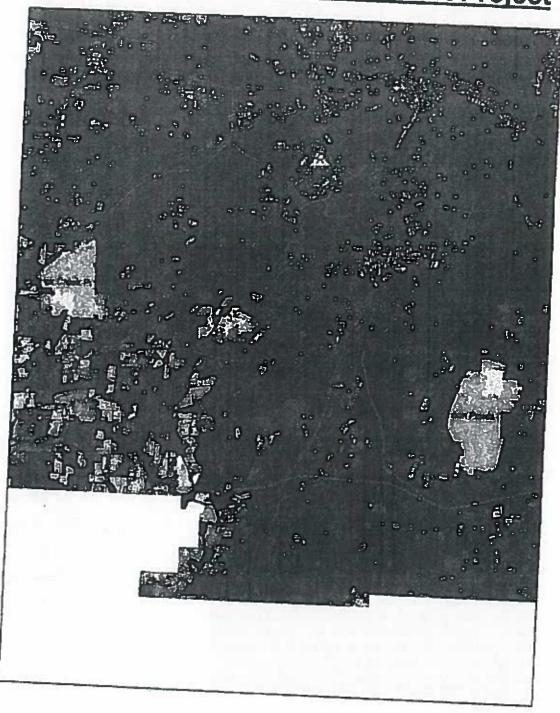

The asphalt paving of the existing stone parking lot will not significantly increase stormwater runoff, however the County does intend to establish two grassed swales adjacent to the pickleball courts. Runoff will not be conveyed via a stormwater sewer system. As a result of the aforementioned, there are no significant impacts to waterbodies are anticinated.

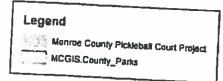

The NYS-DEC Environmental Resource Mapper was reviewed and while non listed species were identified and wetlands are in the vicinity of the project area, the project will not significantly change the existing conditions on site. Therefore, no significant impacts to flora and fauna are anticipated

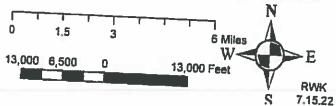

Check this box if you have determined, based on the inf	
Check this box if you have determined, based on the inf that the proposed action will not result in any significant.	ormation and analysis above, and any supporting documentation,

Carrier State and Date State at

This location is in the vicinity of Rare Freshwater Mussels – Not Listed by NYS

If your project or action is within or near an area with a rare animal, a permit may be required if the species is listed as endangered or threatened and the department determines the action may be harmful to the species or its habitat.

If your project or action is within or near an area with rare plants and/or significant natural communities, the environmental impacts may need to be addressed.

The presence of a unique geological feature or landform near a project, unto itself, does not trigger a requirement for a NYS DEC permit. Readers are advised, however, that there is the chance that a unique feature may also show in another data layer (ie. a wetland) and thus be subject to permit jurisdiction.

Please refer to the "Need a Permit?" tab for permit information or other authorizations regarding these natural resources.
