RESOLUTION NO OF 2022
CLASSIFICATION OF ACTION AND DETERMINATION OF SIGNIFICANCE PURSUANT TO STATE ENVIRONMENTAL QUALITY REVIEW ACT FOR CONSTRUCTION OF A SPRAY PARI AT ONTARIO BEACH PARK
BE IT RESOLVED BY THE LEGISLATURE OF THE COUNTY OF MONROE, as follows:
Section 1. The Monroe County Legislature determines that the construction of a spray park a Ontario Beach Park is an Unlisted action.
Section 2. The Monroe County Legislature has reviewed and considered the Short Environmental Assessment Form dated July 15, 2022 and has considered the potential environmental impacts of the construction of a spray park at Ontario Beach Park pursuant to the requirements of State Environmental Quality Review Acand has found that the proposed action will not result in any significant adverse environmental impacts. The Monroe County Legislature hereby issues and adopts the Negative Declaration attached hereto and made a parthereof and determines that an environmental impact statement is not required.
Section 3. The County Executive, or his designee, is hereby authorized to take such actions to comply with the requirements of the State Environmental Quality Review Act, including without limitation, the execution of documents and the filing, distribution, and publication of the documents required under the State Environmental Quality Review Act, and any other actions to implement the intent of this resolution.
Section 4. This resolution shall take effect in accordance with Section C2-7 of the Monroe County Charter.
Environment and Public Works Committee; August 22, 2022 - CV: 7-0 File No. 22-0275

Short Environmental Assessment Form Part 1 - Project Information

Instructions for Completing

Part 1 - Project Information. The applicant or project sponsor is responsible for the completion of Part 1. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification. Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information.

Complete all items in Part 1. You may also provide any additional information which you believe will be needed by or useful to the lead agency; attach additional pages as necessary to supplement any item.

Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The existing location at Ontario Beach is a gently graded / relatively flat grassed area, utilized as a passive recreational area. Use of this area for increased recreational purposes would occur on MB hydic soits. Earthen disturbances during construction would be less than 0.50 acres and erosion and sediment controls would be utilized impacts to fand anticipated.

The project would not result in additional stormwater runoff entering an stormwater sewer system, however the project would be connect to the senitary sewer system. Annual potable water usage is estimated between 7 to 8 million gallons, with that, flow would be directed to the senitary sewer system. The project is within the 100 year floodplain for Lake Ontario and will be designed and constructed to allow the senitary sewer system to be shunted off, thus eliminating flow into the senitary sewer system during a flood event. As a result of the aforementioned,

In 1986, the City of Rochaster designated the area as a critical environmental area, noting that it is a environmentally sensitive area. The NYS-DEC Environmental Resource Mapper was reviewed and no threatened or endanger species were mapped within the project area. As a result, no significant impacts to flora and fauna are

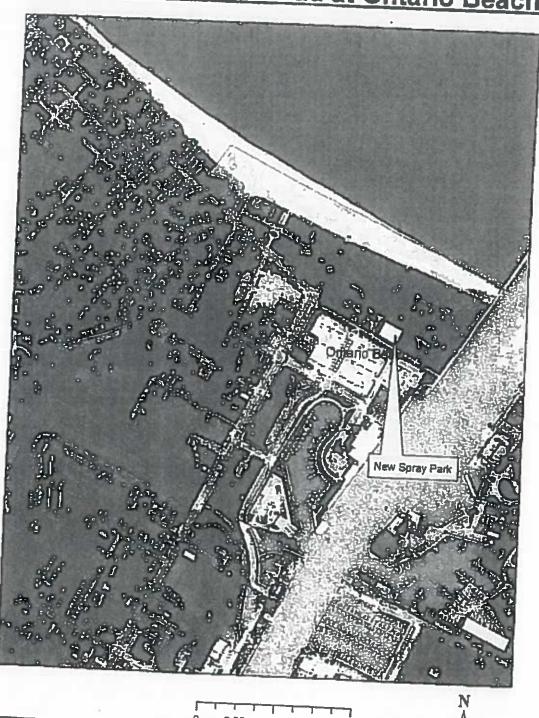

There are two remediation sites within 2000 ft of the proposed project, the lighthouse point inland and the old Rochester city landfill on Pattonwood. As the project would not impact these remediation sites, no significant impact

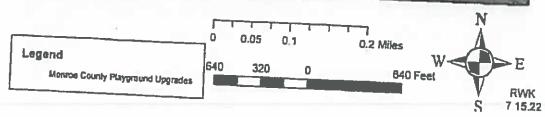

The project is consistent with the community character and the concept of a spray park was noted within several local community master plans. Therefore, no significant impact to the community character is noted.

Check this box if you have determined, based on the inf that the proposed action may result in one or more posential impact statement is required. Check this box if you have determined, based on the infe that the proposed action will not result in any significant Monros County	emation and analysis above, and any supporting documentation, adverse environmental impacts.

If your project or action is within or near an area with a rare animal, a permit may be required if the species is listed as endangered or threatened and the department determines the action may be harmful to the species or its habitat.

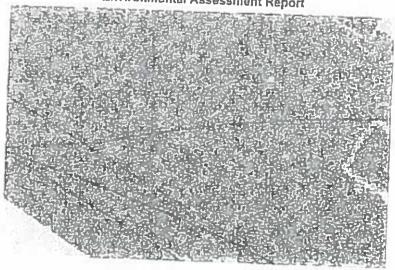

If your project or action is within or near an area with rare plants and/or significant natural communities, the environmental impacts may need to be addressed.

The presence of a unique geological feature or landform near a project, unto Itself, does not trigger a requirement for a NYS DEC permit. Readers are advised, however, that there is the chance that a unique feature may also show in another data layer (ie. a wetland) and thus be subject to permit jurisdiction.

Please refer to the "Need a Permit?" tab for permit information or other authorizations regarding these natural resources.

Disclaimer: If you are considering a project or action in, or near, a wetland or a stream, a NYS DEC permit may be required. The Environmental Resources Mapper does not show all natural resources which are regulated by NYS DEC, and for which permits from NYS DEC are required. For example, Regulated Tidal Wetlands, and Wild, Scenic, and Recreational Rivers, are currently not included on the maps.

Office of the County Executive

Monroe County, New York

Adam J. Bello County Executive

August 5, 2022

OFFICIAL FILE COPY

Not to be removed from the Office of the Legislature Of Monroe County

Committee Assignment ENV. & PUB. WORKS ...

To The Honorable Monroe County Legislature 407 County Office Building Rochester, New York 14614

Subject: Classification of Action and Determination of Significance Pursuant to the State Environmental Quality Review Act for the Construction of a Spray Park at Ontario Beach Park

Honorable Legislators:

I recommend that Your Honorable Body determine whether the construction of a spray park at Ontario Beach Park may have a significant adverse impact on the environment pursuant to the State Environmental Quality Review Act ("SEQRA").

This project, a component of the proposed \$9.4 million in Phase II Monroe County Parks system-wide improvements, would build the first spray park in the county system and would provide a welcome alternative on days when water quality issues close the lake swimming area and for those who cannot swim.

The construction of this spray park has been preliminarily classified as an Unlisted Action. The SEQRA regulations found at 6 NYCRR Part 617 require that no agency shall carry out or approve an Action until it has complied with the requirements of SEQRA.

The specific legislative actions required are:

- 1. Determine that the construction of this spray park is an Unlisted action.
- 2. Make a determination of significance regarding construction of this spray park pursuant to 6 NYCRR 617.7.

3. Authorize the County Executive, or his designee, to take such actions to comply with the requirements of the State Environmental Quality Review Act, including without limitation, the execution of documents and the filing, distribution and publication of the documents required under the State Environmental Quality Review Act, and any other actions to implement the intent of this resolution.

This designation will have no impact on the revenues or expenditures of the current Monroe County budget.

I recommend that this matter be referred to the appropriate committee(s) for favorable action by Your Honorable Body.

Adam J. Bello

Sincerely

Monroe County Executive

Instructions for Completing

Part I - Project Information. The applicant or project apparance is responsible for the completion of Part I. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification. Complete Part I based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information.

Complete all items in Part 1. You may also provide any additional information which you believe will be needed by or useful to the lead agency; attach additional pages as necessary to supplement any item.

Part I - Project and Sponsor Information		
Monroe County Installation of Spray Park at Ontario Beach Park		
Name of Action or Project:		
Installation of new spray park at Ontario Beach Park		
Project Location (describe, and attach a location map):		
The Project is located at one site at Ontario Beach Park.		
Brief Description of Proposed Action:		
The new spray park / splash pad feature would be located at Ontario Beach Park, east of the Ontario Beach Park is a popular park during the summer time due to the Beach, however, pa water clarity causes' patron frustration. The spray park would provide an alternative option du option for individuals with differing needs.	existing playground, Mappin nodic beach closures due to ning beach closures and prov	g attached. Short Environmental Assessment Form Part 2 - Impact Assessment

Part 2 is to be completed by the Lead Agency.

Answer all of the following questions in Part 2 using the information contained in Part 1 and other materials submitted by the project sponsor or otherwise available to the reviewer. When answering the questions the reviewer should be guided by the concept "Have my responses been reasonable considering the scale and context of the proposed action?"

ī	. Will the proposed action create a material conflict with an adopted land use plan or zoning regulations?	No, or small impact may occur	Moderate to large impact may occur
		7	
2	and proposed action result in a change in the use or intensity of use of land?	1	
3.	action impair the character or quality of the existing community?		
4.	Will the proposed action have an Impact on the environmental characteristics that caused the establishment of a Critical Environmental Area (CEA)?		
5.	Will the proposed action result in an adverse change in the existing level of traffic or affect existing infrastructure for mass transit, biking or walkway?	+=	
6.	Will the proposed action cause an increase in the use of energy and it fails to incorporate reasonably available energy conservation or renewable energy opportunities?	V	
7.	Will the proposed action impact existing: a. public / private water supplies?		
	b. public / private wastowater treatment utilities?	V	
3,	Will the proposed action impair the character or quality of important historic, archaeological, architectural or aesthetic resources?	V	
l.	Will the proposed action, essent in an attention	V	
_	t-1004 trota min tantia) t	7	
_	Will the proposed action result in an increase in the potential for erosion, flooding or drainage problems?	7	
1.	Will the proposed action create a hazard to environmental resources or human health?

Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The existing location at Ontario Beach is a gently graded / relatively flat grassed area, utilized as a passive recreational area. Use of this area for increased recreational purposes would occur on MB hydic soils. Earthen disturbances during construction would be less than 0.50 acres and erosion and sediment controls would be utilized as needed during construction. As soil erosion and sedimentation controls would be utilized, there are no significant impacts to land anticipated.

The project would not result in additional stormwater runoff entering an stormwater sewer system, however the project would be connect to the sanitary sewer system. Annual potable water usage is estimated between 7 to 8 million gallons, with that, flow would be directed to the sanitary sewer system. The project is within the 100 year off, thus eliminating flow into the sanitary sewer system during a flood event. As a result of the aforementioned, there are no significant impacts to flooding as a result of this project.

In 1986, the City of Rochaster designated the area as a critical environmental area, noting that it is a environmentally sensitive area. The NYS-DEC Environmental Resource Mapper was reviewed and no threatened or endanger species were mapped within the project area. As a result, no significant impacts to flora and fauna are enticipated.

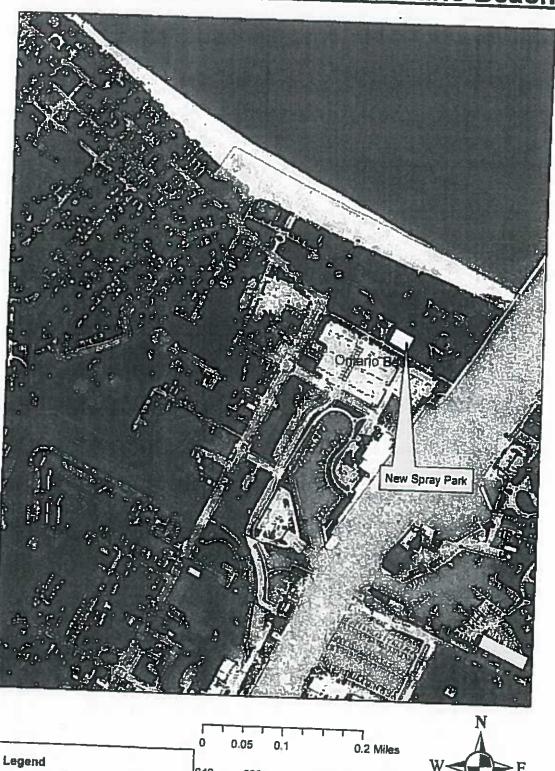

There are two remediation sites within 2000 ft of the proposed project, the lighthouse point inland and the old Rochester city landfill on Pattonwood. As the project would not impact these remediation sites, no significant impact is noted.

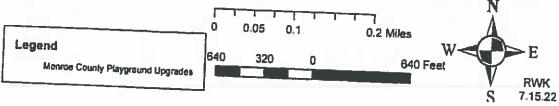

The project is consistent with the community character and the concept of a spray park was noted within several local community master plans. Therefore, no significant impact to the community character is noted.

Check this box if you have determined, based on the infit that the proposed action may result in one or more potential impact statement is required. Check this box if you have determined, based on the infit that the proposed action will not result in any significant Monroe County

If your project or action is within or near an area with a rare animal, a permit may be required if the species is listed as endangered or threatened and the department determines the action may be harmful to the species or its habitat.

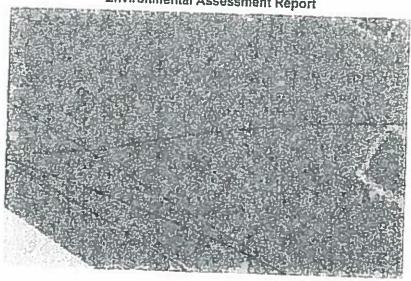

If your project or action is within or near an area with rare plants and/or significant natural communities, the environmental impacts may need to be addressed.

The presence of a unique geological feature or landform near a project, unto itself, does not trigger a requirement for a NYS DEC permit. Readers are advised, however, that there is the chance that a unique feature may also show in another data layer (ie. a wetland) and thus be subject to permit jurisdiction.

Please refer to the "Need a Permit?" tab for permit information or other authorizations regarding these natural resources.

Disclaimer: If you are considering a project or action in, or near, a wetland or a stream, a NYS DEC permit may be required. The Environmental Resources Mapper does not show all natural resources which are regulated by NYS DEC, and for which permits from NYS DEC are required. For example, Regulated Tidal Wetlands, and Wild, Scenic, and Recreational Rivers, are currently not included on the maps.
