County Executive

Thomas J. Frys, P.E.
Director

March 18, 2025

Dear Neighbor:

Monroe County plans to replace the existing bridge carrying **Walker Road over Moorman Creek** in the Town of Hamlin. This bridge is located approximately 0.5 miles east of Walker Lake Ontario Road (NY-260).

The existing bridge was originally constructed in 1935. The bridge has been inspected regularly and has been deemed by the Monroe County Department of Transportation to be near the end of its useful life. The existing bridge is proposed to be replaced with a new pre-cast concrete deck sitting on cast-in-place reinforced concrete abutments.

Construction is scheduled to begin in the spring of 2026. During that time, Walker Road will be closed to vehicular and pedestrian traffic at the bridge site. A signed detour will be posted via Walker Lake Ontario Road (NY-260), Brick Schoolhouse Road, and Hamlin-Parma Townline Road.

The project is estimated to take approximately 5 months to complete. Additional information will be sent out in the spring of 2026 in advance of the planned road closure.

Please refer to the attached project information sheet for more information on the preliminary design for the project and the proposed detour route. If you have any questions or comments on the project, please contact me by phone at 585-753-7731, or by e-mail at davidkubiak@monroecounty.gov. **Please submit all comments or questions no later than April 11, 2025.**

Sincerely,

A handwritten signature in blue ink, appearing to read "D. Kubiak".

David M. Kubiak, P.E.
Transportation Project Manager

WALKER ROAD BRIDGE REPLACEMENT PROJECT

OVER MOORMAN CREEK (BIN 3317660, SIN 06-205-053)
TOWN OF HAMLIN, MONROE COUNTY, NEW YORK

Project Description

- The project proposes to replace a structurally deficient bridge on Walker Road, located 1/2 mile east of NYS Route 260, in the Town of Hamlin.

Project Objective

- Address structural and hydraulic deficiencies to meet current standards.

Proposed Improvements: Bridge Replacement

- Complete removal of the existing bridge.
- Installation of a new prestressed hollow-core bridge.
- Installation of concrete U-walls at each corner of the bridge.
- Placement of stone fill slope protection for prevention of erosion and scour.
- Full reconstruction of the road section immediately adjacent to the bridge structure; consisting of 10-ft. travel lanes and 6-ft. shoulders.
- Installation of bridge rail and box-beam guide rail.
- Refer to the back of this letter for preliminary plan layout of the proposed bridge structure.

Maintenance and Protection of Traffic

- The project will require closure of Walker Road.
- Local traffic will be maintained up to the bridge.
- Through traffic will follow the 3.6 mile long detour route (as shown above) for the duration of construction (approx. 5 months).

Right of Way

- The acquisition of Easements along portions of the properties adjacent will be required.
- The easements will be needed for construction of the bridge and for future maintenance of the bridge.
- Affected property owners will be contacted during preliminary design.

Tentative Schedule & Costs

- Preliminary Design: Ongoing
- Final Design: Fall/Winter 2025
- Start Construction: Spring 2026
- Complete Construction: Fall 2026
- Estimated Construction Costs: \$2.0 Million
- Project Funded: NYS "BridgeNY" program and Monroe County Funding
