**Short Environmental Assessment Form
 Part 3 Determination of Significance**

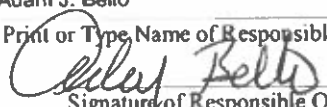

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The Department of Environmental Conservation (DEC) EAF Mapper indicated that the project is near a potential historical site. The project is approximately 360 feet north of 368-372 Hudson Ave and 350 feet south of 168 Weeger Street which are listed as eligible properties on the NYS Cultural Resource Information Center (CRIS). This project will not have a significant adverse impact on the National Register Eligible properties. None of the properties are adjacent to nor directly across the street from the project site.

The Department of Environmental Conservation (DEC) EAF Mapper indicated that the project is near a potential and unspecified archeologically sensitive site. However, the project site has previously been developed at least as far back as 1888 and will not impact any archeological sensitive sites.

The Department of Environmental Conservation (DEC) EAF Mapper indicated that the project site is near a environmental remediation site. The Former Wollensack Optical site code C828209 is approximately .7 miles north of the project site. The site classification is C indicating that the DEC has determined that remediation has been satisfactorily completed under a remedial program. The site will not be disturbed and will have no impact on the project site due to their location and remediation classification.

The surrounding area is currently zoned residential in accordance with the City's existing Comprehensive Plan. The existing land is vacant. Surrounding parcels are residential with single family homes. Accordingly, the development of new single family homes on existing residentially zoned parcels will not alter the character, intensity, environment, traffic levels, or other important historic, archaeological, or aesthetic resources. Therefore, the proposed action will not result in any significant adverse environmental impacts.

<input type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
<input checked="" type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
